Re: Dust Suppressant – Comtech DC-100-49

Dear Mr. Allen,

This letter serves to authorize use of Comtech DC-100-49 for a dust suppressant in the state of West Virginia. Please note the following restrictions which should be made available to any customer/applicator who intends to use the product as a dust suppressant in West Virginia. You may design your own notification process but you are required to provide the following to users of the product:

- Applications of Comtech DC-100-49 as a dust suppressant shall not take place during a storm event or when a storm event is imminent.
- This product shall not be mixed with hazardous waste/materials, used oils, or any other mixture that may have the potential to contaminate groundwater or surface water.
- Extreme caution must be used when applying the product to prevent direct runoff into waters of the state.

This authorization is contingent upon this product being used as a dust suppressant and the requirement that any changes of product formulation, processing, manufacturing, or any other change or modification of the product or its composition shall first be communicated to the Division of Water and Waste Management for review prior to product use.

Please retain this letter for your records. If you have questions concerning this matter, please contact Don Criss of my staff at (304) 354-0474 or by email at [Don.R.Criss@wv.gov](mailto:Don.R.Criss@wv.gov).

Sincerely,

Yogesh Patel, Chief Engineer  
Division of Water and Waste Management
